In this activity you will be using CSS grid to layout the page below.

Files provided:

- Images folder
    - 5811294a.jpg
    - 5811311a.jpg
    - 5811339a.jpg
    - 5811348a.jpg
    - 5811351a.jpg
    - 5811359a.jpg
    - 5811388a.jpg
    - 5811390a.jpg
    - 5811392a.jpg
    - Bouquet-2495234_640a.png
    - Flower-2661156_640a.png

- Styles folder
    - Normalize.css
- CSSgrid.txt = file with text for the content and image captions.
- CSSgrid-assign_directions.pdf = these directions.

Directions:

Using the resources provided code the page using the CSS code as follows:

- Use the normalize.css file provided. (Do not add code to this file.)
- Create a second external .css file for the CSS code you are writing.
- This page will span the full width of the browser window.
- Header:
  - Navigation:
    - Design as you have in the past using CSS.
    - Navigation background color is #144437.
    - Navigation text color is #F2E06
    - Company name is 'Flowers Galore'.
    - Use flower-2261156_640a.png as the company logo.
  - Header image:
    - Design as you have in the past using CSS.
    - Use 5811311a.jpg for the header image.
- Content area:
  - Using CSS grid, design this area as a grid area.
  - Follow the example provided above.
    - There are 6 columns and 2 rows.
      - Each column is a maximum width of 200px.
      - Use the 'fr' unit when sizing the columns.
    - A 2em column and row gap needs to be added.
    - Use CSS grid properties to align text and bouquet image.
    - Order of the images does not matter.
      - Images are:
        - 5811294a.jpg   - 5811359a.jpg
        - 5811339.jpg   - 5811388a.jpg
        - 5811348a.jpg   - 5811390a.jpg
        - 5811351a.jpg   - 5811392a.jpg
    - Each image has a caption. You can use any of the captions to go with any of the images. Use each caption only once on the page.
  - Hints:
    - The following information found in Blackboard | Lesson 15 | Videos and Articles area is helpful for this activity.
      - CSS Grid Layout Crash Course (video)
      - How to create website layouts using CSS grid (video)
      - Create A Dynamic Layout With CSS Grid Using Auto Fit and Minmax (video)
      - A Complete Guide to Grid (article)
- Footer area:
  - Add your name in the footer of the .html file.
  - Footer background color is #144437 (same as the navigation).
  - Footer text color is #F2E06 (same as the navigation).
